Description	
SERIES DESCRIPTION	
112 dB(A) Alarm	
PART DESCRIPTION	
<p>This heavy duty back-up alarm operates from 12-36 VDC and provides 97 or 112 dB(A). The reverse mounted speaker and the REVO manual volume adjustment covers the challenging heavy duty applications. It's universal mounting bracket with slotted holes covers a range of popular surface mounting applications. Durable enough to have a "lifetime warranty," the 22 gauge steel housing has an 18 gauge mounting plate, all protected with a powder coat paint and an epoxy encapsulated circuit board. It is sealed against dust, moisture, vibration and is steam clean/pressure washable. Lead wires are provided to allow for over moulded or hard shell connectors protecting from corrosion. This alarm works on positive or negative ground systems and is protected from reverse polarity and voltage transients. It is manufactured in the U.S.A. by ECCO--certified to ISO 9001.</p>
